Skycure® for

MobileIron

MobileIron Tech Alliance PARTNER

Holistic Mobile Security

In addition to physical security, Skycure detects network, application and malware threats.

Proactive Protection

Automated detection and remediation stop attacks before they make it into the enterprise.

Actionable Risk Managment

Skycure analyzes and reports on network, application and device-level risks.

Crowd Wisdom

Skycure analyzes and reports on network, application and device-level risks.

Solution Overview

Together with MobileIron, Skycure enhances enterprise mobile security with a holistic approach that seamlessly identifies and remediates threats, vulnerabilities and attacks on all levels – physical, network, malware and application.

Skycure's patent-pending technology provides unparalleled visibility into threats without meddling with user experience. Skycure's predictive technology is based on years of research and leverages massive crowd intelligence to proactively identify threats and secure mobile devices.

Key Features

Application protection, Network Protection, Malware Protection, Security dashboards and reports for complete visibility into: Affected devices and users, Compliance policy violations, suspicious networks and suspicious applications.

Three Modes of Deployment

	No real-time data sharing between the consoles	Skycure fetches data from MobileIron without altering its configuration	Leverages compliance rules, policy enforcement and deployment automation

Use Cases

Active Threat Detection

Skycure proactively detects threats, intrusions, and malware at the device, network and app levels and communicates the risk score to MobileIron for policy enforcement.

Predictive Intelligence

By analyzing both the malicious and legitimate behavior, Skycure's predictive analysis gives MobileIron customers a 360-degree view of all incidents, whether or not they affect their networks or devices.

Skycure for MobileIron: Multilayered Mobile Threat Defense

Skycure for MobileIron fully allows you to deploy a risk-based mobile security strategy. Upon flagging a device as high risk, Skycure for MobileIron can restrict access to a corporate network, install or remove configuration profiles, block or remove managed applications, change settings, wipe the device and enforce other policies—which can easily be authored via a simple central management portal. Learn more about Skycure for MobileIron's comprehensive mobile threat defense capabilities below:

Malware Defense

- Defends against malicious repackaged apps
- Monitors, analyzes and detects anomalies in apps from their prescribed behavior
- Calculates dynamic risk levels for apps based on permissions, origin, reputation and app structure
- Enacts guided incident responses against mobile malware and spyware

Network Defense

- Acts as a shield against malicious Wi-Fi networks via crowd wisdom
- Detects, blocks and remediates malicious iOS profiles
- Safeguards corporate credentials from networks performing Man-in-the-Middle (MiTM) attacks and traffic decryption or redirection
- Automates VPN tunneling via Skycure or corporate VPN in case of active threats

Vulnerability Defense

- Monitors devices for unpatched known vulnerabilities
- Educates users and notifies IT security staff to aid with vulnerability management
- Uncovers and protects against zero-day OS/app vulnerabilities
- Detects and protects against known vulnerabilities such as No iOS Zone, Stagefright, Swiftkey and many others
