

## Proactive Threat Management

The best way to manage the rising costs of data breaches is to be proactive in threat management. Skycure for Citrix harnesses predictive intelligence, [crowd wisdom](#) and world-renowned research to predict, detect and proactively mitigate mobile attacks.

## Better Corporate Resilience

Skycure for Citrix adds real-time visibility and automated remediation to any active mobile threat, targeted cyber attack and vulnerability exploit on both BYOD and corporate owned devices.

## Optimized User Experience

Skycure public mobile [apps](#) have a [minimal footprint](#) on devices, resulting in pleasant, non-invasive experiences. Only upon raising the risk level for a device by actively detecting a threat or attack, will Skycure for Citrix stop access to sensitive information—and then automatically remediate the problem by enforcing the right policies. Maintain mobile productivity 24/7.

## Solution Overview

Your enterprise mobility faces a new risk landscape. The bar has been raised and it is more important than ever to add mobile threat intelligence to your existing enterprise mobility management solution. Skycure, the world's leading Mobile Threat Defense (MTD) solution, collects data lakes of highly useful, context-rich mobile threat intelligence to build the most complete living picture of mobile threats, allowing Citrix customers to proactively stay ahead of attackers anywhere in the world.

## Extend Citrix with Intelligent Mobile Threat Defense

Skycure for Citrix extends your organization's mobile security with next-generation Mobile Threat Defense capabilities: proactively detect and automatically remediate known and unknown threats, vulnerabilities and active attacks across all mobile attack vectors. Integrate Skycure with Citrix's XenMobile now to protect 100% of your mobile devices—practice mobilefirst, BYOD-friendly business with no compromises.

Skycure for XenMobile adds the power of Mobile Threat Defense to extend XenMobile's EMM capabilities into areas of enterprise mobility formerly out of reach. Gain real-time visibility over the threats and attacks originating from public WiFi and mobile networks, OS/app vulnerability exploits, malicious apps and user behavior that may be compromising your company-owned and BYO devices. This multilevel approach to mobile security is required to outpace today's wellfunded, highly socialized hackers.

Ultimately, with Skycure for Citrix, you can centralize security and compliance management with policy enforcement based on real-time risk levels. Mobilize without compromise, enhance mobile security analytics, and excel without barriers in the appbased, data driven world.

# Skycure for Citrix: Multi-layered Mobile Threat Defense

Skycure for Citrix fully allows you to deploy a risk-based mobile security strategy. Upon flagging a device as high risk, Skycure for Citrix can restrict access to a corporate network, install or remove configuration profiles, block or remove managed applications, change settings, wipe the device and enforce other policies—which can easily be authored via a simple central management portal. Learn more about Skycure for Citrix's comprehensive mobile threat defense capabilities below:

## Malware Defense

- Defends against malicious repackaged apps
- Monitors, analyzes and detects anomalies in apps from their prescribed behavior
- Calculates dynamic risk levels for apps based on permissions, origin, reputation and app structure
- Enacts guided incident responses against mobile malware and spyware

## Network Defense

- Acts as a shield against malicious Wi-Fi networks via [crowd wisdom](#)
- Detects, blocks and remediates malicious iOS profiles
- Safeguards corporate credentials from networks performing Man-in-the-Middle (MiTM) attacks and traffic decryption or redirection
- Automates VPN tunneling via Skycure or corporate VPN in case of active threats

## Vulnerability Defense

- Monitors devices for unpatched known vulnerabilities
- Educates users and notifies IT security staff to aid with vulnerability management
- Uncovers and protects against zero-day OS/app vulnerabilities
- Detects and protects against known vulnerabilities such as [No iOS Zone](#), [Stagefright](#), [Swiftkey](#) and many others
